

METHOD 9 VISIBLE EMISSION OBSERVATION FORM

Date: April 5, 2016
 Observer: Ethan Chatfield
 Affiliation: U.S. EPA

Source name: AEP - Conesville Station
 Source address: 47201 County Road 273
Conesville, Ohio 43811

Facility type: coal-fired power plant

Emission location (stack, roof, etc.): Stack
 Direction from emission location: SW
 Estimated emission location height: Stack height = 800 feet
 Estimated distance to emission location: 4,600 feet

Plume color: bluish white
 Background: sky
 Background color: blue

Sky color: blue
 Cloud color: none

Estimated wind speed: < 2 mph
 Approximate wind direction: Northwest

Temperature: 35 °F

Additional Comments
 (photos/video taken, etc.):

Method 9 & 2 also taken

Lat 40°10'30.030
Lon 81°53'18.000

40 C.F.R. Part 60, Appendix A, Reference Method 9

2.3 Observations. "Opacity observations shall be made at the point of greatest opacity in that portion of the plume where condensed water vapor is not present."

2.3.1 Attached Steam Plumes. "When condensed water vapor is present within the plume as it emerges from the emission outlet, opacity observations shall be made beyond the point in the plume at which condensed water vapor is no longer visible. The observer shall record the approximate distance from the emission outlet to the point in the plume at which the observations are made."

2.3.2 Detached Steam Plume. "When water vapor in the plume condenses and becomes visible at a distinct distance from the emission outlet, the opacity of emissions should be evaluated at the emission outlet prior to the condensation of water vapor and the formation of the steam plume."

"On an overcast day when no shadows are observed and the lighting is diffuse or flat, this rule might not be as important from a scientific standpoint as on a bright, sunny day. Observers might have trouble defending their positions in court if they disregard the rule. The best practice for an observer is to always have the sun at his or her back, even if it is not visible and no shadows are cast." <http://www.epa.gov/ttn/encr/methods/ECourse.pdf>
